ethnic cleansing has become one of the key terms of the fin de siècle in the former territory of yugoslavia along the fringes of the old soviet empire and in africa whole populations are being murdered or forced from lands they have lived on for centuries andrew bell fialkoff explains the history of this obscene practice tracing it from antiquity to the present and showing how in different times and places the most varied criteria have been used to isolate and destroy previously accepted or even completely unnoticed groups cleansing has been based on race gender class sexual preference and

religion and has been a constant evil in world history the need to understand its reemergence in the wake of communism's collapse is at the center of this important book

the book that is providing a storm of controversy from israel's bravest historian john pilger renowned israeli historian ilan pappé's groundbreaking work on the formation of the state of israel along with the late edward said ilan pappé is the most eloquent writer of palestinian history new statesman between 1947 and 1949 over 400 palestinian villages were deliberately destroyed civilians were massacred and around a million men women and children were expelled from their homes at gunpoint denied for almost six decades had it happened today it could only have been called ethnic cleansing decisively debunking the myth that the palestinian population left of their own accord in the course of this war ilan pappé offers impressive archival evidence to demonstrate that from its very inception a central plank in israel's founding ideology was the forcible removal of the indigenous population indispensable for anyone interested in the current crisis in the middle east ilan pappé is israel's bravest most principled most incisive historian john pilger pappé has opened up an important new line of inquiry into the vast and fateful subject of the palestinian refugees his book is rewarding in other ways it has at times an elegiac even sentimental character recalling the lost obliterated life of the palestinian arabs and imagining or regretting what pappé believes could have been a better land of palestine times literary supplement a major intervention in an argument that will and must continue there's no hope of lasting middle east peace while the ghosts of 1948 still walk independent

this volume is the result of a conference held at duquesne university in november 2000 the conference brought together sixty scholars primarily historians but also specialists in other fields as well as survivors of ethnic cleansing from seven different countries who presented forty eight papers

mention ethnic cleansing and most americans are likely to think of sectarian or tribal conflict in some far off locale plagued by unstable or corrupt government according to historian gary clayton anderson however the united states has its own legacy of ethnic cleansing and it involves american indians in ethnic cleansing and the indian anderson uses ethnic cleansing as an analytical tool to challenge the alluring idea that anglo american colonialism in the new world constituted genocide beginning with the era of european conquest anderson employs definitions of ethnic cleansing developed by the united nations and the international criminal court to reassess key moments in the anglo american dispossession of american indians euro americans extensive use of violence against native peoples is well documented yet anderson argues that the inevitable goal of colonialism and u.s. indian policy was not to exterminate a population but to obtain land and resources from

the native peoples recognized as having legitimate possession the clashes between indians settlers and colonial and u s governments and subsequent dispossession and forcible migration of natives fit the modern definition of ethnic cleansing to support the case for ethnic cleansing over genocide anderson begins with english conquerors desire to push native peoples to the margin of settlement a violent project restrained by the enlightenment belief that all humans possess a natural right to life ethnic cleansing comes into greater analytical focus as anderson engages every major period of british and u s indian policy especially armed conflict on the american frontier where government soldiers and citizen militias alike committed acts that would be considered war crimes today drawing on a lifetime of research and thought about u s indian relations anderson analyzes the jacksonian removal policy the gold rush in california the dispossession of oregon natives boarding schools and other benevolent forms of ethnic cleansing and land allotment although not amounting to genocide ethnic cleansing nevertheless encompassed a host of actions that would be deemed criminal today all of which had long lasting consequences for native peoples

genocide has scarred human societies since antiquity in the modern era genocide has been a global phenomenon from massacres in colonial america africa and australia to the holocaust of european jewry and mass death in maoist china in recent years the discipline of genocide studies has developed to offer analysis and comprehension the oxford handbook of genocide studies is the first book to subject both genocide and the young discipline it has spawned to systematic in depth investigation thirty four renowned experts study genocide through the ages by taking regional thematic and disciplinary specific approaches chapters examine secessionist and political genocides in modern asia others treat the violent dynamics of european colonialism in africa the complex ethnic geography of the great lakes region and the structural instability of the continent s northern horn south and north america receive detailed coverage as do the ottoman empire nazi occupied europe and post communist eastern europe sustained attention is paid to themes like gender memory the state culture ethnic cleansing military intervention the united nations and prosecutions the work is multi disciplinary featuring the work of historians anthropologists lawyers political scientists sociologists and philosophers uniquely combining empirical reconstruction and conceptual analysis this handbook presents and analyses regions of genocide and the entire field of genocide studies in one substantial volume

traces the history of ethnic cleansing and its relationship to genocide and population transfer illustrating why the practice has grown in incidence in the twentieth century as modern states and societies continue to organize themselves by ethnic criteria

this book confronts the problem of the legal uncertainty surrounding the definition and classification of ethnic cleansing exploring whether the use of the term ethnic cleansing constitutes a valuable contribution to legal understanding and praxis the premise underlying this book is that acts of ethnic cleansing are first and foremost a criminal issue and must therefore be precisely placed within the context of the international law order in particular it addresses the question of the specificity of the act and its relation to existing categories of international crime exploring the relationship between ethnic cleansing and genocide but also extending to war crimes and crimes against humanity the book goes on to show how the current understanding of ethnic cleansing singularly fails to provide an efficient instrument for identification and argues that the act in having its own distinctive characteristics conditions and exigencies ought to be granted its own classification as a specific independent crime ethnic cleansing a legal qualification will be of particular interest to students and scholars of international law and political science

from terrorism to social inequality and from health care to environmental issues social problems affect us all the encyclopedia will offer an interdisciplinary perspective into these and many other social problems that are a continuing concern in our lives whether we confront them on a personal local regional national or global level

the dark side of democracy is the most comprehensive study of ethnic cleansing across the world giving in depth coverage of terrible cases like armenia the nazi holocaust cambodia yugoslavia and rwanda as well as cases of lesser violence in early modern europe and in contemporary india and indonesia

using a new approach to ethnicity that underscores its relative territoriality h zeynep bulutgil brings together previously separate arguments that focus on domestic and international factors to offer a coherent theory of what causes ethnic cleansing the author argues that domestic obstacles based on non ethnic cleavages usually prevent ethnic cleansing whereas territorial conflict triggers this policy by undermining such obstacles the empirical analysis combines statistical evaluation based on original data with comprehensive studies of historical cases in central and eastern europe as well as bosnia in the 1990s the findings demonstrate how socio economic cleavages curb radical factions within dominant groups whereas territorial wars strengthen these factions and pave the way for ethnic cleansing the author further explores the theoretical and empirical extensions in the context of africa its theoretical novelty and broad empirical scope make this book highly valuable to scholars of comparative and international politics alike

putting forward the argument that the strength of democracies can be measured in how well minorities especially ethnic and racial minorities are treated by the majority. Larry May's *Ethnic Cleansing* maintains that unjust ethnic cleansing is one of the greatest internal challenges to the modern institutions of pluralistic and multicultural states. In order to determine what constitutes the crime of ethnic cleansing, this book details crucial conceptual issues around the topic such as what ethnicity means, what ethnic cleansing claims to achieve, why these acts are invariably harmful, and the conditions of restitution, reparation, and reconciliation. Affirming that ethnic cleansing must be countered by existing institutions such as the international criminal court, which is uniquely situated to prosecute ethnic cleansing, this is the first major study to analyze ethnic cleansing from an explicitly normative and conceptual perspective. In the last decade, the increase in number and complexity of cases of ethnic cleansing makes this a timely book to understand the challenges that confront contemporary society.

This book sheds light on the causes and consequences of ethnic cleansing in the twentieth century Balkans, with particular reference to the former Yugoslavia in the 1990s. In providing a thorough and consistent analysis of large-scale episodes of ethnic cleansing in modern Balkan history, *Politics of Ethnic Cleansing* fills an important gap in existing conflict and peace studies literature, offering a top-down interpretation of the expulsion of ethnic national minorities as a means of state building. The analysis rests on a fresh multidimensional approach which provides an eclectic discussion of nationalism, politics, and security. This book establishes an agenda for policy making and future research by making specific proposals for clearing up the present ambiguities in international humanitarian law related to ethnic cleansing, rethinking humanitarian intervention with a view to restoring the long-term viability of the target states, and repudiating the argument for forced homogenization as a conflict resolution strategy.

Combining history, politics, and critical analysis, he revisits the killing fields of Cambodia, documents the three-month Hutu machete genocide of about 800,000 Tutsi villagers in Rwanda, and casts recent headlines from Kosovo in the light of these other conflicts. **Book Jacket**

In the modern Greek city of Thessaloniki, the ruins of a vast Jewish cemetery lie buried under the city's university. Nearby is the site of the childhood home of one of the founders of the modern Turkish state. These are tantalizing reminders of what was once the bustling cosmopolitan city of Salonica, home not just to Greeks but to thousands of Sephardic Jews, Turks, Bulgarians, and Armenians living and working peacefully alongside one another. Thessaloniki is just one example among many of what used to be. Over the past two centuries, ethnic cleansing has remade the map of central and eastern Europe and the middle

east transforming vast empires that embraced many ethnic groups into nearly homogenous nations towns and cities from germany to turkey still show traces of the vanished and nearly forgotten ethnic and religious communities that once called these places home in terrible fate benjamin lieberman describes the violent transformations that occurred in salonica and hundreds of other towns and cities as the ottoman russian austro hungarian and german empires collapsed to be reborn as the modern nation states we know today his book is the first comprehensive history of this process that has involved the murder and forced migration of tens of millions of people drawing upon eyewitness accounts contemporary journalism and diplomatic records lieberman s story sweeps across the continent taking the reader from ethnic cleansing s earliest beginnings in bulgaria greece and russia in the nineteenth century through the rise of nationalism both world wars the armenian genocide the holocaust and the rise and fall of the soviet empire up to the breakup of yugoslavia in the 1990s along the way he examines the decisive roles of political leaders not only monarchs and dictators but also those who were democratically elected as well as ordinary people who often required very little encouragement to rob and brutalize their neighbors or who were simply caught up in the tide of history
